Monzavi I bought Cracking the TOEFL iBT with Audio CD, 2009 Edition (College Test Prep)( Princeton Review) and Kaplan TOEFL iBT with CD-ROM 2008-2009 (Kaplan Toefl Ibt) .i read both of them for one month and passed the ibt by 97. This is what I think about these two books on all four part of ibt: Princeton Review Reading 3 out of 5: good strategies but the readings are simpler than the real exam Writing 5 out of 5: great strategies and samples with good drills Speaking 4 out of 5: good strategies and drills but difficult to use on exam Listening 4 out of 5: good strategies and sample but limited number Overall 4 out of 5: the most important negative point is that it comes only with audio cd and you can not experience the real exam condition. Kaplan Reading 5 out of 5: great strategies and samples Writing 2 out of 5: some useful techniques but not so helpful Speaking 2 out of 5: some useful techniques but too general Listening 4 out of 5: good strategies and examples Overall 3.5 out of 5: the most important positive point is that you can create the real exam condition by its cd-rom at home. 1 of 1 people found the following review helpful. Type of paper could be better By Amazon Customer Really useful book for TOEFL preparation, but... the book's type of paper could be better. Recycled paper is not the most adequate paper for writing, and this book has a lot of writing exercises. 3 of 3 people found the following review helpful. Very good By dalia This book is amazing. I studied it for less than a month and did my test few days ago. The test looked very familiar to me as the book gave me great background about the test. I love this book and the CD made it even easier to get to know the test more and more. See all 154 customer reviews...
