Misch and his love of creating classifications By DrSam As an homage to Dr. Misch and his love of creating classifications, I am going to give this book a Class 5 on the DrSam scale of textbook ratings. It is a great book, and Dr. Misch et al. are amazingly talented and respected. It does seem, however, at times he is pushing his own classifications a little heavily. I'm not sure if this is due to a lack of available classifications or a desire to be remembered in implant history. In any case I find myself skipping over a few of the repackaged Misch classifications. I haven't been to any of his lectures yet, but I'm hoping to sometime in 2015. 0 of 0 people found the following review helpful. Please buy AND READ! By Franco Ferrara Wow... Amazing book. I heard some reviews calling it the bible of implants and I have to agree! Best investment I've made in a while. 0 of 0 people found the following review helpful.
